Silent But Deadly

I'm a fan of Silent Hill and have all of them so far. I've got your walkthrough for Silent Hill 3 but I'm afraid vou've got the code in the hospital wrong and the door won't open. So that makes it even harder to get through

the game. Could you please help me find the right code for the door on the second floor?

Martin Sewerynski,

Scotland

we haven't got the code wrong as the code changes every time you play (sorry that wasn't made clearer in the guide), as does every other code in the game. Look at the blackboard nearby for help on what the code actually is.

I'm sorry to tell you, Martin, that

Wake Me Up.

I love Wakeboarding Unleashed but I'm ready to throw it into the river! I iust can't do the Star Search in Venice. All the previous levels have

been relatively easy but this one is rock hard. Can you give me any tips on how to complete this challenge?

Steve Fisher, Poole

■ This is a tricky one but it can be done with practice. You must get every star here

There are only 50 stars up for grabs!

because there are none going spare, and you only have one minute to get all 50 so there's no room for error. Cut right as far as you can, and then immediately left again and jump up the wake, letting go of the rope at the same time. This should launch you up to the edge of the roof of the nearby building. Grind this edge as well as the wire that it leads to, and then the balconies. Grind all three balconies and the wires in between, and then jump to

the left after the third one and arind the ledge. Jump to the edge of the roof, and then jump over to the ledge of the large building opposite. You must grind this ledge all the way round, so you must try to keep your balance. Grab the rope when you get the chance on the other side, and then jump just after you collect the last star on this ledge. Grind the rail of the bridge that you land on to collect the last two stars. Good luck!

Shattered Gamer

Contra: Shattered Soldier is the hardest game I've ever played but after many, many hours I made it to the final boss, only to receive a sound beating. Do you have any hints on how to beat it before I have another attempt?

Colin McGann, Brighton

■ The last boss isn't that difficult but it comes as a bit of a surprise when you think you've completed the game. It has only two attacks in the first, pink energy balls are fired at you that bounce around, so make sure you duck or jump away - stay near the edge of the plane to best avoid them, but you need quick reflexes.

Secondly, the boss sucks in air and expels four fireballs at you. You can tell when an attack is coming, because the frog takes a big breath. To avoid the fireballs, stand up until the last second and then duck. They should fly past your head to safety. If you duck too soon, the fireballs will be aimed at the plane and ignite the wing, making jumping difficult. Keep firing your machine gun at the boss and before you know it, you'll be victorious!

Dead Hard PS2

I'm nearly at the end of Dead To Rights but I'm stuck on one of the bosses, Pinnacle. He's so big and strong that my punches have almost no effect on him. How the hell do you beat him? David Marsh, Dover

■ You can't beat him just by hitting him, you must strangle him. Keep dodging and wait until he does a big punch combo. After it he'll bend over out of breath for a few seconds - this is your chance! Move round so you're behind him and press @ to jump on his back. Now button bash ⊕+⊕ to

reduce his Oxygen meter and

Don't let him grab your neck!

The Matrix

Has You

Pinnacle is extremely difficult to beat.

I hope you can help me, as Enter The Matrix is driving me up the wall. The level giving me problems is called Under The City, where you try to escape the Twins. I just can't make it to the end of the level without getting blown to bits. How do you get past this gruesome twosome, as they seem to be indestructible? Seth Franklin, Hammersmith

■ The level is quite short, but extremely difficult thanks to the idiot they employed to drive your car. Your goal is simply to blast everything that moves and try to blow up as many vehicles as possible to prevent the Twins from catching up with you. Don't waste your ammunition trying to shoot the Twins, as they are totally immune to bullets - concentrate all your firepower on blasting any cars

ow up those vehicles or you'll get caught.

in your way. Sometimes you'll need some luck to survive this mission.

I'm stuck at the very end of Prisoner Of War on Chapter 5. I've managed to destroy the lab and now the Germans are after me. I know I've got to get to the glider to make my escape but I just can't get to it without getting caught.

Albert Davis, Folkestone

■ You have exactly five minutes to get to the glider and that won't be easy considering you're still in the German Compound. Dash back to the Admin Office and make your way through the German Canteen, makina sure vou check everv keyhole for German troops. Once out in the courtvard duck under the barriers and proceed to the Bell Tower, then climb to the top as fast as you can. Tally-ho!

Once in the courtyard, duck under the ba

Fight The Fur

I'm on the Quackenheim Museum level in Fur Fighters but I can only find eight of the nine babies. I've got a feeling the last one is in the vault but I don't know the combination to get inside. Can you tell me what the combination is? **Gavin Butler, Chester**

■ If you want the combination go up to the first floor and into the cinema to watch Claude's film. Once it's finished push the buttons at the back of the room in this order – Bowl. String, Cat. Claude will then tell you the combination of the vault in the basement. Use it to get in and you'll see a Tweek baby on the diamonds hanaina down. Go up the stairs and glide down to reach it then go through the exit.

Spy Hard

I know this game is a bit old now but I'm hoping you can still help me. I can't destroy all the scout subs on the mission Venetian Blind in Spy Hunter. I know it's only a secondary objective but I want to complete them all, can you help?

Dennis Rogers, Glasgow

- To destroy the subs you will need to be in Stealth mode, otherwise they will hide underwater. Before every sub is a stealth charge, so make sure you don't miss them.
- 1. The first stealth charge is at the top of the stairs at the end of the road you start on. Once you are in Stealth mode target the sub up ahead and fire your missiles at it. (2). The second stealth charge is on

the left soon after the first sub. Drive up on to the land and up the ramp to reach it - when you land make sure you don't go back in the water. When you jump from the next ramp, target and destroy the second sub.

3. Carry on along the road to collect another stealth charge. When you get round the corner you'll see the sub in the water on the right. Target it and wait until you are up in the air from driving up the stairs before firing your missiles.

4. When you have disabled the rocket, drive through the doors into the cathedral and up the stairs. Drive through the stained glass window at the top in order to find a stealth charge. When you land, boost to the water and then destroy the sub around the corner.

Once past the Weapons Boat

you'll come to another stealth charge on the right so use it to destroy the sub up ahead.

(6). Around the next bend is another charge on the left. Once collected, go over to the ramp on the right to get back on the land. When you see the sub in the water, destroy it.

(7). When you're back on dry land after disabling the nuclear sub, stick

to the right and use the ramp round the corner to reach a stealth charge. Target the sub in the water ahead and destroy it.

As you're a fan of Spy Hunter, Dennis, you may be interested to know that there's a sequel being released later in the year, and a possible movie in the works starring Dwayne 'The Rock' Johnson.

Boss Bore

I bet you get questions about final bosses all the time, but I'm really stuck on Drek in Ratchet & Clank. Can you tell me how to defeat him, as it's really starting to get on my nerves?

Kevin Fields, Liverpool

■ Don't worry Kevin, if we didn't get any questions about bosses we'd have to make up our own as that's pretty much all we get asked! When the fight against Drek begins you are still playing as Giant Clank, but unfortunately Drek has his own giant robot. After you've hit him a couple of times Clank gets returned

to his normal size, which is slightly unfair. Fill up with ammo from the Gadaetron Vendor then swina across to where Drek moves. Hit him with as many rockets as you can, avoiding his rockets and bombs. When a quarter of his energy has gone he'll move to another platform, so follow him. Watch out for mines this time and continue to hit him with rockets and your Blaster. Once his energy is down to half he'll move again. After the cut-scene run to the button and Power Slam it to stop the timer. Now continue to hit Drek with rockets. He will turn the timer on twice more, so get to it quickly to stop it. Once his health is down to a

quarter he'll start firing big energy bolts at you. Dodge them and keep firing until he's defeated. After the cut-scene Power Slam the switch to fire the cannon at the Blarg's new planet. Congratulations, the galaxy is safe again

Oliver's Army

Dear POWERSTATION,
I want to join the Marines when I am old enough, and have a point to raise with you. Why is it that in all war games on the PS2, you play as American troops, rather than British ones? It is an annoying bias, and I for one would love to play a game where you get to be the British instead of the Americans!

Oliver Wilson. Dorset

■ It isn't something that is uppermost in our thoughts to be honest, Oliver. We just like playing games, no matter which side we are on! However, if you are that keen to play as the Brits then you could try SCI's Conflict Desert Storm. In this game you are able to play as British Special Forces, complete with some comedy accents!

Virtual Insanity

Dear PowerStation,
My mate says that he is going to get
a PSX soon, and claims it has just
come out. But surely the PSX is the
PSone, which was out years ago and
is ancient! What's going on?
Marcus Elton, Bangor

■ The PSX is actually a home entertainment system, set for a release in 2004. It will incorporate the PS2 chipset, so can play all PS2 and PSone games, but it will also act as a DVD player and recorder. A built-in TV tuner will allow programmes to be recorded to the 120 Gb hard disc or to a DVD, and there'll also be a broadband Ethernet connection. It's expected to retail for £300-£400, and your friend will be rubbing your face right in it.

Stuck On You

Dear PowerStation. Why are so many games these days so hard to complete? I'm not just talking about games that challenge you and take a great deal of effort to complete, but games where it becomes stupidly hard to get anywhere. For example, Contra has some ridiculously tough boss battles, and if you want to unlock everything you have to do them ALL without getting killed! I am finding it sooo frustrating and it is sending me mad. Also, in The Angel Of Darkness, Lara dies time after time not because what she has to accomplish is difficult, but because the controls to make her do things don't work properly. It must frustrate you guys too, as you have to play all the games and unlock everything!

James White, Northwood

It certainly can be frustrating when a game gets very tough, and Contra in particular is one of the hardest we have ever played.

However, it is a good thing, in our book, that games are difficult. After all, if you spend £40 on something, you want it to last. Most games also offer different skill settings and rewards for different levels of player; it stands to reason that on the top skill settings things get very difficult.

Bad controls are, however, the most annoying things in Christendom. Your Tomb Raider example is a good one; Lara made such a meal of performing simple tasks that it just becomes incredibly annoying.

However, if you are ever stuck on a PS2 game, you know where to turn – POWERSTATION, of course!

Surely no-one can have bought MK: DA without realising it was a little bloodthirsty?

Blood 'N' Guts

Dear POWERSTATION,
I recently played Mortal Kombat:
Deadly Alliance and enjoyed it, but
when I did Kano's fatality, I was
disgusted by the amount of blood
and guts. What I want to know is why
so many games for the PS involve
ripping people to bits?

I understand that the game is an 18, but it shouldn't have been put on the shelves.

Jack Cochran, Nottingham

■ Have you been living on another planet for the past few years, Jack? Mortal Kombat has ALWAYS been notoriously bloody and violent and the fatalities in particular have ALWAYS been particularly graphic. As a result, the game was rated 18 by both the BBFC and ELSPA, to ensure that people knew the contents were for adults only. If you don't like violence, then don't play notoriously violent games — simple enough, isn't it?

Movie Watch

Dear PowerStation,

Can I just say a few words about film licence tie-ins? Why are there so many poor games made by developers? Take Star Wars and The Simpsons as examples. Clone Wars

Clone Wars: pants

was pants (I took it back the same day) and Simpson's Skateboarding was also rubbish. I can honestly say I had never found a good game to come from a TV or film, until I played Enter The Matrix.

As a decent film tie-in, it is a novelty; I have nearly finished it (with some help from your guide). Who knows, it may even restore my faith in TV and film tie-ins. Well, at least until the next pile of bile comes out, which I will buy because I'm an idiot. Mark Russell. Cheshire

■ This is a recurring theme throughout videogame history, Mark - film licences have often been hugely disappointing, lazily programmed affairs. The reason is simple; the success of the original licence means that the game will sell well however bad it is, so many companies do not invest much money into their titles as they know they won't see much difference in the return. Why spend millions to make a great game when it will sell by the bucket load anyway? Best to save the money and increase the profit. Enter The Matrix is one of the better efforts at a film licence in recent times, but it still isn't exactly a classic. Hopefully there are a few developers out there working on true top-class film titles that will deliver value for money. We'll believe it when we see it...

Enter The Matrix was a passable effort.

something of a gimmick to me. I doubt it will catch on to be honest.

i've got one already! And I have to urge everyone else to do so immediately! At first I wasn't sure but then I got a bonus at work and I thought 'why not?' so I got it. It's perfect for the kids (I have two little people) who love leaping around playing the games that come with it, but it wasn't until I came back from the pub with a couple of mates until I realised just how much fun it could be. Admittedly I was a bit wellied, and physical co-ordination isn't a strong point at the best of times, but we were in fits of laughter. I'd compare it to a dance mat; you might think it sounds like a stupid idea, but once you have one, there's loads of fun to be had. I actually think it is more fun than a dance mat (yes, I have one of those too, I must be old and out-of-touch) because it has a few more potential applications. Get yourself an Eye Toy, and you won't regret it, I promise. I haven't laughed so much in years!

Posted 24 July 2003 10:48 PM

Are Sony planning to do anything else with the Eye Toy? Or is it just a one-off with the games in the pack that you can buy now?

Posted 27 July 2003 09:55 PM

As I understand it there are more games planned. There is also the chance that the device will be compatible with online games so you can see as well as hear other players in online games. Not sure how successful it is going to be in that respect, but certainly as a 'novelty' add-on it is greaf fun. My mate has one and we both think it's greaf fun. My mate has one and we both think it's greaf fun. But it can't half knacker you out! I believe sony have also mentioned the possibility of using the device to let players photograph their face and map it onto a character in their online games, which is cool - and of course, there's always things like video-conferencing that it could be used for.

AMSEGIYS

Well, what can I say about this month? I got loadsa crap letters an' emails as usual from idiots stuck on the easiest missions. Sometimes I think I'm the only one who's actually any good at this frickin' game. What am I sayin'? I KNOW I'm the only one who's good at this game - I'm'a GTA god, ya morons!

Dear Frankie,

It is possible to blow up Hillary's car in The Driver mission. When the mission starts quickly hop out of your car and enter the Blow Up All Cars cheat. Hillary will blow up with his car so steal a car to finish the race. You'll come first but when you cross the finish line it will say 'Mission Failed' and a message saying Hillary died. Bob, via email

FRANKER What's the point of blowing Hillary up if it Answer me this, moron don't let you win the race in tha end? That's gotta be tha dumbest thing I ever heard!

Dear Frankie 'The Finger'.

I'm confused, because I don't know what the next GTA game is. First it was just GTA4, and then I heard it was Sin City, now it's San Andreas. I was hoping you could tell me for sure what the next one is. Adam Weir, via email

It don't take much to Confuse ya does it? I doubt tha people makin' tha game have decided on a name yet, an' what difference does it make what it's called

anyway? Why don't ya worry about somethin' more important ya idiot.

Dear Frankie 'The Finger',

I've finished all the levels in Vice City but I can't find the Sea Sparrow anywhere. I was wondering if you could print a photo of its whereabouts, I've checked every shore but I just can't find it. Ross Agnew, Falkirk

ITRANKIE of ya mansion on Starfish Island. It ain't always there though so keep tryin!

You'll find it round tha back

Dear Frankie 'The Finger',

When you kill Diaz and you do the mission when you go to the North Point Mall and smash all the windows, I find it very difficult. Could you give me some tips on how to do it? Liam O'Reilly, Burnley

SHARK!!

Dear Frankie 'The Finger'.

I just want ask you something: what the hell is the point of the Easter egg if it doesn't do anything? Also, I have found a big shipwreck which is north of North Point Mall, and a fat guy who's wearing concrete boots east of the Greasy Chopper biker bar. Have fun big shot.

Sam Thomson, via email

There ain't no point to SAYS: tha Easter egg, it's just a secret ta find, what the hell do ya want it to do? Ya may

have found the shipwreck and guy in concrete boots but ya didn't find the submarine west of tha shipwreck or tha shark swimmin' around tha same area, ya frickin' wiseguy.

SORTS IT! Send your questions or cheats to: GTA Wiseguys, POWERSTATION, Or email thefinger@ Paragon House, St Peter's Road, paragon .co.uk Bournemouth, BH1 2|S

FRANKIE: can stop in tha pits ta get it fixed but this'll cost ya a few If ya car gets beat up you places. Drive-bys are still allowed so make sure you're carrying an automatic to dispose of your opponents. It ain't exactly sportsmanlike but it'll help ya win tha race.

Dear Frankie,

I'm a big fan of the Friday 13th films and I've read that there's a Jason Voorhees outfit in *Vice City*. Can you tell me if this is true and where to find it? **Thomas Benn, Leicester**

Ya must be talkin' about the SAYS: To most object the same of the same hockey mask. Finish that off with a machete and I guess you'd look like Jason. Ta get tha outfit ya gotta complete the Malibu Club mission The Job. It'll then be available from the

tha windows is to use a gun as ya don't have ta go right up ta tha window ta do it. Keep movin' otherwise the mall security and police will be on ya case.

Dear Frankie.

Why is Lance so slow? On 'Death Row' he is so slow to get to the car and you fail the mission. Why can Lance not run fast, he always lets you down, I'm glad you have to kill him on Keep Your Friends Close. Also, how you get past Cap the Collector?

Alex Summerly, Tyne and Wear

HANKIE He's slow 'cause he's just been tortured, ya insensitive idiot. As for 'Cap the

Collector, just make sure ya got a fast car so you can catch 'em all.

Dear Frankie,

I'm trying to complete all the arena races but I'm having real trouble with the Hotring. My car just gets destroyed or I don't finish in the top three. Do you

TIME TRAVEL

Dear Frankie 'The Finger',

My mate says there's a DeLorean in Vice City like the car in Back To The Future. I've never seen one cruising the streets so I don't believe him, can you tell me whether this is true or not? Jack Mason, Salisbury

He's talkin' about the FRANKIE He's talkin about the Deluxo, which bears a passin' resemblance to

a DeLorean with the exception that it don't go back in time if you get it up ta 88mph, more's the pity. Ya won't see 'em cruisin' tha streets 'cause they're only available from Sunshine Autos once ya complete tha first car list at A+B Auto

It ain't a DeLorean but it's the next best thing

TRAINING PITCH

>> WHERE THE BEJEWELLED ONE PASSES ON HIS WISDOM...

I've had a lot of letters asking for help making that first promotion from Division Three – this is a difficult task, especially on the harder difficulty settings. I've decided to pass on the wisdom of my experience to you, so listen to the master!

QUESTIONS

IF YOU HAVE A QUESTION RELATING TO A FOOTBALL GAME (NOT JUST PRO EVOLUTION) THEN SEND IT IN TO:

TRAINING PITCH,

COUNTDOWN
Pro Evolution 3 is now due out in November. Start saving those pennies!

You don't want a system that leaves you exposed at the back.

The Formation

I've always found that the standard formations work fairly well, and prefer the 3-4-3B formation as it offers good attacking options as well as leaving the defence strong. However, in the early games, before you can sign anyone, it can make sense to go for 4-5-1 and play to hit your opponents on the break until you have a couple of star players to exploit.

The Personnel

Your starting squad doesn't cut the mustard, frankly, and more

Selecting the right tactics and formation can make all the difference

players are needed. However, if you get too many then you'll be struggling to pay their wages, so don't sign more than five players in your first season. NEVER bid for players at other clubs - go for unregistered international players instead, they are far cheaper. I always try to get five of the following onboard during the transfer window: Rustu (Turkey, GK), Kilbane (Ireland, MID), Tainio (Finland, MID), Olisadebe (Poland, ATT), Mpenza (Belgium (ATT), Allback (Sweden, ATT) and Babangida (Nigeria, WNG). With some of these guys on board, you should find results start to swing your way.

Fast players like Overmars are a real benefit to your side, and it is vital to check that all-important speed stat.

Selection Process

The third division has fewer teams to worry about, so fatigue is not a major problem. That said, make sure you sub your star players if you are winning comfortably, to keep them fresh for the next game. When choosing a team, speed is the most important asset to bear in mind – a slow player is no good to anyone.

Long Term Plan

On harder difficulties (especially on Extreme) it is better if you take a while to get promoted. After three seasons, you will have a squad which is capable of doing well in Division Two; early promotion can often result in an under-strength squad which will consequently come straight consequently come straight.

back down again. As a result, it makes sense to build your squad slowly, buying five players or so each season. This should help you win more games and even out your points deficit, so some cash can be accumulated over the rest of the campaign and after a couple of years, your squad should have the strength in depth to make real progress.

Look out for unsigned internationals!

Sustainable improvement is the way to go

LARA CROFT TOMBRADER

ANGEL OF DARKNESS

Let's face it, there's only one magazine you can trust to take you through the second part of Lara's latest adventure: PowerStation!

THE LEGEND RETURNS

LARA'S BACK!

Welcome to part 2 of the definitive guide to Lara's new exploits! Because last issue was so popular, and some readers may have missed it, we've reprinted the levels from The Archaeological Dig onwards, as well as the new missions from Prague. Armed with this, completing the game is easy!

GETTING THE MOST OUT OF LARA

TIDG

SAVE YOURSELF

Large parts of The Angel of Darkness involve difficult jumps to be performed, and if they aren't pulled off, then Lara can plunge to her death pretty darned

quickly. As a result, it makes a great deal of sense to save your game regularly, so that you needn't keep repeating large sections of the game over and over again

TIPS

GIVE THE GIRL A HAND

When the hand symbol appears in the bottom right of the screen, it means Lara can interact with something when you press the & button. It is worth

searching rooms and areas to see if the hand symbol appears at all. If it does, you might find she can open a door or cupboard to find some goodies.

UP THE WALL

Lara can climb some walls, but it isn't always obvious which ones. If you seem to be at a dead end, try climbing the walls!

GETTING STRONGER

Lara can earn physical upgrades as she progresses through the game, and these can then allow new areas to be reached. If Lara says "I'm not strong enough" or something similar at any point, the odds are that an upgrade is available to you on that level, and that the new area will be accessible once it has been located. Typically, upgrades are earned by pulling certain crates towards you or breaking doors down.

PARIS

ARCHAEOLOGICAL DIG

In this cabin kill the guard, then use the switch on the wall to power up the machines in the next area.

Another guard will be in this tent, so take him out.

Use the machine in here to scan the ground. To the top left of the area, you will find a strange symbol. Take the printout of it and leave.

Here, Lara learns more about the dig. Take another printout of a strange symbol. As you leave, another guard attacks, so be careful.

Climb down to the bottom of the pit and kill the guard. Climb the wall to the top, hang under the bridge and go to the far side. Pull up onto the bridge and head for the object of the dig, the pillar of rock.

Call the lift to the top, then drop down to the level below, where

Lara is faced with a puzzle. There are four levers round to the right and by pulling each one down, the corresponding row will not move when Lara pulls the lever on the main puzzle. Think of it as a fruit machine with 'hold' and 'nudge' buttons and things should be a little bit easier to understand. Lara must get the code by moving the puzzle round until she has a piece in the right place, then going to the levers and pulling the corresponding one down to keep it in place. When all four symbols are correctly matched, the door above will open and Lara can drop through to the next level. Two of the symbols are written down in Von Croy's notebook - the outside symbols. The two etchings you have found are the missing pair of symbols that go in the middle of the puzzle.

TOMB OF ANCIENTS

Follow the corridor along and drop down to reach the tomb itself. A long way down, isn't it! Begin by climbing down to the ledge below Lara, by hanging onto the wall. From here, jump to the wooden beam that is jutting out, and enter the nearby tunnel. Drop down to land on the broken bridge. Take a running jump across the bridge (aim to land on the left-hand side, as it's a bit lower).

Pick up the Bandages on the far side, then jump diagonally from the bridge to the only platform without a gargoyle on it. From here, leap to the next platform (with a gargoyle, near a ledge). Drop and shimmy round the edge of this platform until you can drop safely onto the ledge sticking out from the side of the chamber. A section of this ledge is climbable wall, so climb down to the next opening, then hold the wall again and head left to another ledge. From here, jump to another beam sticking out from the wall. Pull the lever on this beam to reveal a series of ledges, and use them to reach the ground floor.

You can't kill the skeletal guard at the bottom, so save your ammo.

Instead, crawl through a small gap to find another lever. Pull it, and more platforms will be revealed. Use them to reach the alcove with the orange tinge and pull another lever. This opens the trap door at the bottom of the pit, so return to the ground and drop through it.

Head right and kick through the door to earn an **Upgrade**, and get

right of the door, then QUICKLY run through the room to the far side to get through the door. Don't worry about avoiding the darts too much, as they only cause a little bit of damage, the key thing is to jump over the huge blades that appear after the lever is pulled. On the far side, carry on through the doors to complete the level.

Jump over the blades in this room and run through the far door!

The skeleton cannot be killed, so preserve your ammo.

Getting this grate open is what this level is all about, so jump to it!

THE HALL OF SEASONS

PARIS

THE HALL OF SEASONS

This circular room is a hub for four sub levels. Each of the four stones in the middle of the floor opens three doors, all of which have levers to pull. Every time a lever is pulled, a trapdoor opens. If you are quick, you can jump back to safety, but if not you drop into a new level

below ground. It is a circular corridor full of traps, but they aren't difficult to avoid. Head around until you find a lift on the outside wall that returns to the main hub, then pull a DIFFERENT lever in front of one of the other doors. When all the levers have been pulled, the main room will open.

Dodge the fireballs from the undead guard, then grab the Amma. Jump into the water and swim down to a submerged room. Swim through the door at the end (timing it so you miss the blades) and pull the lever. Swim back to the first room and pull up out of the water. Drop through the hole into the room you just filled with water. On the bottom, near the plants, is a small corridor. Swim through it and pull the lever at the end, then return and pull up through one a newly opened gap into a circular pipe that drops down at the end.

Swim like fury now, as this will be a close-run thing. You will need to dodge past some evil blades, so save regularly to avoid frustrating deaths, and pull up for a breather in a small room off to the right. Then it's back into the water, and through to the main room, where you can grab a water crystal. Head to the bottom of the pillar that had the water crystal on it, and pull the lever there, then swim up through the open grate. Take a breather, then enter the newly opened door. Return to the first room, and leave with the crystal!

WRATH OF THE BEAST

Follow our guide to getting to the far side of the room. Look out for collapsing platforms, which require moving onto the next jump quickly. Save often, and be careful crossing the final bridge as it collapses and you need to stay to the right-hand side. Take the Earth Crystal from the door and the room will transform again.

Now all you need to do is flick the two switches on either side of the room. Dodge the skeletons by jumping a lot, and if you are set alight, head for the water pouring in at either end of the room. When both switches are hit, the door back to The Hall Of Seasons will open.

Jump to the platforms, keeping out of the lava!

Look out for those columns of flame!

Probably the easiest of the rooms, you must simply cross to the far side and grab the Fire Crystal, then return via the platforms that haven't dropped into the fire. It really is that simple, though it is a good idea to look out for those frieballs as they can do some damage. Be ready to jump!

THE BREATH OF HADES

Those winds can blow you away from the platform you aim for - most frustrating.

After flicking the switch behind the wall, these platforms will rise.

AUTUMN

THE BREATH OF HADES

Head to the right of the room and push the wall in to reveal a lever. Pull it to raise a series of platforms. The aim is to get to the far side of the room via the platforms, but the gases expelled by the gargoyles will blow you off course if

they catch you. The swaying platforms can make things a little tricky, but it pays to wait until the platform is the right distance away before jumping. For the shorter jumps, hold **©** while jumping to perform a shorter 'hop'.

PARIS

HALL OF SEASONS

Once all four crystals have been found, place them into the picture frames in the room just off the Hall Of Seasons. This will open a door on the lower level. Go through one of the opened doors and drop down to that lower level (the corridor with all the traps) and work your way round to the door on the inside wall that has now been unlocked.

Head down the spiral staircase and pull the lever to enter a large chamber with a mechanical contraption in the centre. You'll see there are three pipes leading to the central contraption; by each one is a valve. All three need to be turned. The first one is easy – simply head left on the starting platform and it is at the end. The second requires climbing down to the floor, then up the central contraption. On the first

platform is a chain, which you can use to hand-over-hand to a platform near the second pipe. Climb the ladder and backflip to a wooden beam, then climb another ladder to reach the valve.

Jump across to the higher platform on the central machine, and you'll find another chain which you can use to hand-over-hand to a beam where the final valve is located. Return via the chain to the machine, then jump back to the starting platform. Climb to the ground then up to the valve that has opened on the machine. Turn it, then immediately drop off the machine to the floor, as blades appear from everywhere! You need to head back to the door you entered by, so move anti-clockwise round the base of the machine, as that is the way the blades turn and avoiding

them is a little easier. When you see the ladder to the door, jump over to it and exit the room by flicking the switch by the door. Exit into the tunnel of traps and head left until you reach the lift to return to the Hall Of Seasons main chamber.

As you can see, there are now four columns moving up and down in the middle of the room. Climb the lowest one at its lowest point, then jump around them to the largest one, timing your leaps for when the platform you are on is at its highest. From the top pillar, jump and grab the circular platform in the middle, then move to the outside, run around the chamber and head up the stairs.

Run clockwise on the top level until you reach the collapsed section, then climb the wall to the first ledge. Flick the switch to open a door on the previous level, then leg it back there and push the wall to earn a strength Upgrade. Return to the ledge with the switch on, then head up and right to reach another ledge – it's a close call

THE SPIRIT OF THE KEEPER

This boss is actually quite easy to beat. Notice the blue light on one of the statues. It will move if you get too close, so make a note of which statue it's on, then hammer away at the ghost with your shotgun. After a few hits, it will start to sway from side to side. When that happens, put the gun away and run to the statue with the blue light. Press O to get the painting, then run to the door, Head along the corridor and enter the Tomb Of Ancients, which is now flooded. Swim to the top and back out through to the archaeological dig to the Louvre galleries.

and, if successful, you will only just make it! From this ledge, grab the ceiling again and head to the centre of the roof, where you can climb out and left before your grip expires. Head through the door at the top and turn left to reach the boss.

VON CROY'S APARTMENT

PARIS

VON CROY'S APARTMENT

The place is a mess; this guy really should sack his cleaner. Pick up the Ammo scattered all over the floor, and Von Croy's walking stick. Search upstairs in the bathroom for a Heath Pack, and check the book on the desk in the bedroom for some information. Take the goodies from the walk-in wardrobe in the bedroom, then head back downstairs and go through the door surrounded by books, and into the corridor. There are lasers criss-crossing the passage and if they are broken, the whole place will go boom!

Head right, and get some Amma and a Media Pack from the room at the very end of the corridor. Then head through to the squalid flat with the door open. Arm yourself, and pick up the Amma behind the sofa. One of Bouchet's henchman will then fire through the wall and attack. Give him a good battering, and he will eventually flee. It is hard to dodge his bullets, so be ready to use a Nami Pack if required. Follow him (picking up his gun en route) to find more lasers. You need to head right, around the comer, but those three beams are awkward

swines to get past. The best approach is to save your game, then walk towards the OTHER set of lasers. From just in front of them, it is possible to backflip over the first laser, landing under the second. Walk past the higher laser and leap over the last, then head around the corner.

Try to move within shooting range of the henchman as quickly as you can

A bomb will detonate, collapsing the stairwell. Jump right, then across to the first landing. Hang and drop to the bottom, and get the then climb the stairs back up and enter the first floor corridor. At the end is Bouchet's goon who will open fire at you, so make sure you give him a taste of his own medicine. Dodging past the lasers on this floor is easy, as they flash on and off. Go to the hired thug's corpse to complete the level. If it takes a while to get a shot in and kill him, take cover in the doorways on either side of the corridor - but with an automatic gun at your disposal, he should bite the dust pretty quickly

Chat to the guy who's near the car, and use the following responses to what he says:

I gather Vasily was some kind of art dealer. Keep talking till the money runs out. All of them?

Head down the alley behind him and kill the guard. Grab the hammer, and head down the left-hand side of the crime scene building. Kill the guards at the back, then open the grating on the floor and drop through. Head through the hole in the wall of the sewer, and up the stairs to meet Bouchard again. Use the following statements:

So, you sold out.
The Cabal? Not the Mafia?
I found Vasiley's faxes. And four Obscura engravings he sent to Von Croy.
Killed like Vasiley you mean! Why does
Edkhardt do that bodies Bouchard? And what

does he want the paintings for? A Lux Veritatis vault!

Head through the next door, and up the spiral staircase. Run round on the next level to find a pullable crate, giving Lara an upgrade. Use it to climb up the scaffolding and then jump round the platforms until you reach the chain to the left of the stained glass window. Pull it until the light shines on the picture, moving a chest of drawers in the process. Return to the floor to collect a health pack, then head back up to the right-hand chain and pull it until the light shines on the floor and the clock opens.

Return to the floor and wind the clock on (by pressing right ton the D-pad) until it reaches 3. This allows access to a secret office under the room. In there, get the fax from the desk. Read the code on it, and enter it on the keypad behind the desk (31597). The painting slides to one side, giving you the access to the last Obscura engraving. Leave, and return

THE STRAHOV FORTRESS

Leap across to the central section and then grab hold of it.

THE CRATE PUZZLE In order to be able to get to the pipe so that Lara can grab it and then shimmy over to the fence, you need to use the three 'ioose' crates which you will find close to the original formation. Position them as shown here (see picture 1), thus allowing for the first

moves to be made. After you have done this,

In this area, push one of the crates beneath the valve to turn off the gas at point 5.

Use the method explained in the boxout to solve this puzzle and get over the fence.

Climb here and use the machinery to cut open the air conditioning vent. Climb along on top of it, then drop down and pull up to enter the vent. As you crawl through, you will witness a shocking scene...

Drop out of the vent and waste the guard here. Grab the machine gun from the shelves.

Kill three guards in here, and use the computer to shut off the power.

In here, you find the journalist's body. There is a gun on the bed, and bandages in the cupboard.

Head past the lasers (there are also anti-personnel mines here, so be ready with a health kit in case you need it). Jump over the low ones, and crawl under the high ones. The last set of lasers is particularly tricky. Jump diagonally to get over the first one, then crawl under the second. Turn and backflip out over the third. Alternatively, shoot the supports away from a wheel near the vent you emerged from; it will then roll through the lasers and block the last one, making it easier for you to make the last section.

Nearly there! Head for the security door in order to reach the BioDome Facility.

THE BIO RESEARCH FACILITY

Talk to the guy ir. the room to learn that the revival of the Nephilim is close. After finishing with him, approach the fountain. Pulling it reveals a secret entrance which you should go through. Climb the ladder and grab the ammo then flick the switch to open the far door. Press the yellow switch to access the next room. Shoot the creature that escapes, and blast the little anklebiters. Head up the left-hand side of the room and move to the pillar with a pipe on. Climb to the central structure and hit the two valves

Return to the ground floor (via the ladder) and drop into the newlyopened hole in one of the containment tanks. Climb up into the next area, then slide down the ramp and jump to grab the ladder. Head up the ladder for a health pack, then head through the door and down the corridor. At the end, kill the guard in the huge botanical room and head for the top of the room for pills and ammo. Return across the jump and head down to the platform near the water's surface. Climb onto the big pipe and turn the valve at the end to stop the steam hissing out of the thinner pipe above you. Return to that area and edge along until you can climb the pipe. At the top, head left to find a platform with a plant growing up the wall. Use it to climb the wall to a platform high above the room. Drop down the ladder at the

end, down and across to the door on the far wall. Press the switch and go through.

In the next room, the doors are shut by two plants. Go up the stairs and push the crate away from the notice board. The lowest diagram (with a red cross through it) shows the valves that need to be turned to kill the plants. From left to right, they are the first, second and fourth valves. Turn them, then pull the lever at the far right. This kills the plants and allows you into the next area.

In the next section, you need three security passes. The first is easy to get - kill the guy on the ground level and take his. Then go round and up the platforms to the top. On the first floor, jump to get a Health Pack in order to earn an upgrade before trying the big gap that Lara is unsure of. Near the top, you'll have to climb the wall using some ivy to reach an area where you will see a cut-scene, and be able to grab a second pass from the dead body.

AQUATIC RESEARCH AREA

Press the button so that Lara can leave the room. Don't use the ladder or you'll be shot to bits. Drop off the left of the balcony and head left. The crates should stop most of the bullets, keeping you safe. Turn the valve on the left-hand wall to release a gas that confuses the guns, and then run to the far wall and climb the drainpipe. Head right, then up again, and finally right at the top to reach a new corridor. There are two machine guns at the end, but if you take out the Viper SMG, Lara will aim at a device on the right-hand wall as she walks towards them. Shoot at it to trigger an explosion, destroying the machine guns.

Take the door on the right at the end of the passage and climb the ladder. Head along the corridor to reach a water room with a computer in the middle. Head to the right-hand side of the room and jump into the pool there, then pull the switch on the left-hand wall. Swim round and through back to dry land, then go down the passage directly opposite the area you just explored (on the left of the room from your starting location). Lara can open the door in this passage.

In the new room, hit the switch to the right of the door and go through. Hit the switch inside to use the lift and in the new area, head through the corridor. Pull the lever in the new room to restore power. Then retrace your steps to the surface and head to the bin in the centre of the room at the very top. Pull it onto the conveyor belt, and hit the switch to take it across to the far side. Then drag it into the small room and place it beneath the meat-grinder (below the pipe and directly on top of the grate). Pull the switch in that room to fill the bin with ground-up meat. Return the bin to the conveyor belt to earn an upgrade.

Hit the switch and return the bin to the middle of the room. Now head down to ground level and around to the room with the trapdoor in (near the first switch). Climb up into the room and around to the drainpipe on the wall. Climb up, right, up again and then left to drop to another ledge. You will only just have the strength to make it all the way round. Waste him and search the cupboards either side of the door for some amme. Leave and turn right, then hit the switch to drop the meat into the water.

Return to the main chamber and jump into the water, then look for the underwater switch marked 1. This opens the door opposite marked 2, as well as the first door on the floor of the pool. Drop back into the water and go to the other end of the rocky tunnel to find a wall that can be kicked through. In the new room, swim forward and read the

After the cut-scene, drop over the ledge at the end, then sprint past the crusher trap to reach a room with purple-coloured gasses in. Pull the

Then jump to the right-hand of the next two platforms, and straight onto the left-hand platform of the next two. Leap to the solid platform in the middle of the room quickly, as this platform crumbles. The three platforms leading from the middle of the room to the far side are safe, so use them to get there.

BOAZ RETURNS

This boss is a real bitch! Save regularly, and remember that as long as you keep moving, there is very little that can go wrong! Equip Kurtis' gun and use

to target the monster's face. Unload as many shots as are required until Boaz opens four flaps on her back. These shoot deadly acid, so target one and destroy it (you can change which flap you are targeting with the @ button). Once this is done, Kurtis will have to target the face again until the flaps are revealed. Repeat this pattern until all four flaps are destroyed. Remember that they can only be destroyed whilst spitting out acid - whilst the flaps are closed, they cannot be damaged.

Of course, Boaz will not take this all lightly, and has a number of attacks at her disposal too. She will use her claws, spit acid and fire acid breath at Kurtis. When this happens, just make sure that you jump backwards and keep a safe distance, moving in closer and targeting those flaps on her back whenever possible.

When all four flaps have been

destroyed once and for all, Boaz transforms into a flying bug. Avoid her attacks and keep blasting unti she falls – this is actually quite simple to do. Then enter the dark area on the outside of the arena to finish the level – though Kuris gets a nactus ruprice in the quit come a nasty surprise in the cut-scene.

There are three vials Lara must collect. Go up the stairs to the left to find the first at the back of the wooden structure, on a table (there is also a seath) and nearby).

Pull the lever by the grate in the floor and climb the ladder by the

entrance that can now be accessed. At the top go right to jump and grab a ledge with a Neath Pade, Jump back to the platform you were on before, and then onto the raised cage. Part of the roof will collapse, allowing you to grab hold of the second vial. Get out IMMEDIATELY, as the cage is lowered into boiling water! You'll be safe as long as Lara is on top of the cage. There is a crawlspace in this pit that contains the last vial – grab it, and then climb up to the top of the pit and back-flip back out.

Place the vials into the holders to access the next area

Lara must now place all three vials in the correct places. One must be placed into a holder on the wooden structure to the left as Lara entered the lab. The second can be placed directly above it, accessed by using the ladder to the top platform.

The third vial belongs at the back of the room, close to a pool of

boiling water. This then cools the water down. Jump into the pool by this vial, and you'll find the shard that Kurtis needed at the very bottom of it. Head back to the top and then through the newly opened door. Slide down and open the door at the end, and you will begin the final battles!

>> These first four objectives are more or less tutorials to get you used to the controls. Hints are displayed at the bottom of the screen, where appropriate, so you shouldn't have too many problems Head straight ahead and make your way upwards. Drop down and continue on until you reach a clearing. Fill your water canteen at the Fountain (01) on your left, then climb up the platforms on the wall next to you and jump the large gap ahead. Locate the then drop back to the ground and cut your way through the vines covering the door. Use your whip to swing over the hole (02) in the floor then chop through the next vines to the exit.

O3: You can grab the spade to kill these guys... but a machete also does the job

There are 30 artifacts hidden throughout the game. That's three per location for you to find. I have located and collected all 30, you're treated to an art gallery option on the main menu ins over 70 colour renderings of characters and suchlike.

>> From the start, turn left and chop through the vines then follow the room round to the room with the crates in it. Dispose of the hunter in the room, use the machete to cut the rope holding up the crates and head down the hole that's left.

Keep going onward until you reach the clearing, be sure to pick up the SPADE. Use it to take out the hunters (03) then go up the stairs where you'll need to use your whip on the crocodile head to get to the other side. Now make your way back down to the other end by shimmying around the large piece of wall and swinging across the gap at the end. Keep to the path, swinging over both the crocodile

heads you come across until you reach the flooded part of the ruin. You need to make you way to the top here so follow the platforms in the order they're numbered on the map. The hunter near platform 8 will be using a Shotgun @4 so be careful and remember to pick up the SHOTGUN when he's defeated.

Once you reach the corridor after the tenth platform, the floor will crumble and you'll fall... This is unavoidable so don't worry - just swim round to the other side and start climbing upwards again. Once at the top, cross the stone bridge and flick the switch at the other side to open the door at the end of the corridor, which leads you to the exit.

Go up the stairs to your left and move to the far end where you can jump to another platform, then make your way along to the right, using the croc head to swing across and the small ledge on the right-hand wall to hang from.

Once across, continue until you reach the weak point (05) in the wall at the far end. The second you reach here, a door will open behind you and hunters will

When all the hunters are cleared a door opens at the top, so you'll have to get up there. On the right are some ascending pillars; use them to get above where you entered then use the tall pillars 06 to get to the door.

Inside, follow the wooden walkway until you can drop down. The lever in the room just opens the door to get back outside so you don't need to bother. Instead chop through the vine-covered door and enter the room. Don't climb up the vines yet - climb the platforms at

the back of the room first to find a room with the PORT NEGOMBO RELIC inside. Grab the relic and go back to the vine room to climb the vines. Follow the path, rolling under the darts, jumping the gaps and swinging via the croc heads (07) to the exit door. You can get to the grass in the middle by using the small ledge on the right wall; and from here you can find Skulls that you can throw to draw the

Once through the room, follow the path up and around the waterfall, taking out any hunters you come across. Eventually you'll come across a huge chamber with lots of guardians in. Use the Skulls on the floor in the same way as before to gradually make your way between the plots of grass until you get up the stairs at the back. Head down the ladder and down the stairs. If you hit the switch at the bottom, you'll open the cell and find a TABLE LEG; use this to kill the guards in the room then head down the corridor... It's booby-trapped with various hazards (34), so use your jump and roll to avoid them and flick the switch at the end. This opens a door that leads back to the room you started in. It also opens the grate covering that switch you saw earlier, so go back there and flick it.

Go through the previously locked door halfway down the stairs and follow the corridor until you reach a pit. Use the hook in the centre to whip-swing to the other side, then use the ledge on the left to shimmy to the room on the side of the pit

From your elevated position, you can easily swing into the room above the room you were just in. The place is teeming with Luger-toting guards that will have to be dealt with before following the corridor into the main dungeon. Here you will find a FOUNTAIN at one end. Jump up on to the raised section in the middle and pull the lever. This lowers the chains you'll need to reach the next lever at the far side. On one side of the balcony is a chain - use it to climb up to the ledge above you. Jump up on to the roof and then follow the ledge up and around the roof, then up onto the bridged area. A few guards will come running out from a room up here, so take them out before you continue.

Ignore the open door and the ladder and head down the stairs near the bridge, taking a left at the bottom. There's a swing point on the side of the bridge that will take you to the other side and onto a new tower, so swing across onto the wooden pathway. Follow this to the right and enter the door there.

Inside you'll find a switch box in need of a Lever - this can be found upstairs on the table near the telescope 12. Using it on the box will open a panel on the wall near where you picked up the Lever (13), as well as opening up the observatory ceiling.

Go back upstairs and take VEGA'S MANIFESTO out from the panel that opened. Some guards will start breaking down the door, so leg it up the ladder on the side of the telescope and out onto the observatory roof. Take the zipline back down to the first tower and go through the open door that you land in front of. Head down the stairs and past the FOUNTAIN until you're back outside. Head down the stairs on your left then take the door at the end of the path. This will take you back to the clock room. (See TROLOGER'S CLOCK) Stage 3.)

EGA'S TOWER

FIND THE SOUL CRYSTAL RETURN TO THE CLOCK

>> Leave the room and use the chain on the right to swing to the next balcony. Go back inside and up the stairs, then jump out the window at the top onto the next building – it's a long jump so be careful and time it right.

Follow the thin ledge around the building onto another balcony. There are guards on this one who try to throw you off when fighting, so try to keep away from the edge. When you've dealt with them, go back inside and up the stairs. At the top is another window with another huge jump - time the jump so you hit the button

when you're right on the edge. Move around the ledge and use the swing point to reach the ledge opposite, then climb up the chain a bit. Use this chain to swing onto the next chain then swing to the next ledge, where you'll find yet another chain. Climb up to the top of this chain, jump into the bell tower and then into the lift at the

back; this will take you up behind the clock face. Pull the lever in the centre of the room to open the face, then climb the ladder in the corner to find the lever to launch the plane, and you, over to Vega's tower (14).

You'll see the see the see as soon as you enter the tower: it's on the right on Vega's chair (15). But when you pick it up, gas vents open and the doors close. Move quickly... head up the bookcases at the side of the room and climb onto the upper ledge. Use the chandelier to swing across the room and jump through the stained-glass window to safety. Use the chains to make your way downwards then swing into the doorway at the bottom. Head down the stairs to the exit door at the bottom.

After solving the final clock puzzle (see the Stage 4)

DBJECTIVES. I ESCAPE THE CELL AND RECOVER YOUR EQUIPMENT I FIND A WAY INTO THE RUINEO M<u>OSQUE</u>

>> You'll start inside your cell, being attacked by two guards. All your weapons have been taken so you have to fight hand to hand with the first few guards. One of them has a TURKISH KNIFE, so disarm him and use it yourself. When all the guards are dealt with, go down the stairs on the left to a long corridor with a few guards. Tucked away to the left of the corridor you'll find some GRENADES take care using them as they're extremely powerful and will kill you instantly if you're caught in the blast. When you're out in the open again, jump up on to the platform in front of you and go down the stairs on the left. You'll find another corridor to fight your way down. At the end, on the table, is your SATCHEL, a MEDIUT and some Ammo (01).

Make your way back outside and use the swing point to get onto the wall directly ahead. Look around the floor to find another Meswar and then drop down to take out a few more guards. A guard will take control of a fixed machine gun at the far end when you get dose – you'll have to take him out, and then get on the

gun yourself and use it to take out any remaining enemies.

Head down the stairs and out into a large area where four guards will surround you. You'll get a little help from a mysterious stranger but you'll have to do most the fighting yourself. When they're dead and the stranger has disappeared, go through the door that opens and climb up the scaffolding inside. From the top of it you can get on a chain and swing to the upper ledge and then go out onto the roof. Shimmy round to the right and make a jump for the scaffolding ahead of you, then follow the scaffolding round the building until you can get inside.

There is a lift that can be used inside by pushing off the box that is weighing it down, this will take you to the upper level, where there is a zipline leading to more scaffolding for you to make your way round. You'll end up in an area similar to the one you started in, take out the guards and climb up the scaffold to the roof (22), keep heading upwards and you'll eventually reach the exit door.

>> Go left from the start and take the first door. Swing over the gaps using the swing points, then slide down the slope - near the bottom is a swing point you'll have to use to avoid falling to your death. Search around the room you land in to find a MEDICIT. Exit through the door near where you landed and take out the guards on the balcony.

There's a small ledge on the left that you can shimmy around. Take out any guards in the area - there's a MACHINE GUN and AMMO on a table at the back. Go through the back door and down the stairs, taking out the guards as you go. You'll end up in a large room with loads of holes in the floor (03). Make your way around the

room by swinging and shimmying until you reach a gap with a doorway underneath. If you're low on health or just want to top up, continue round the room to reach the FOUNTAIN otherwise just drop down and go through the door. If you fall into the water below you'll have to make your way to the corner you started in and climb the ladder up to the start.

Follow the corridor round to the left, making note of where the explosive point is (04) and take out all the guards in the large room at the end. You can find the EXPLOSIVES and a MEDIOT on a table at the side. Go back to the explosive point and blow it open with the explosives. Exit through the hole and you're done.

ND A MAP OF THE SUNKEN CITY AKE AN ENTRANCE INTO THE PALACE OF BELISARIUS

At one end of the room is another crane – ignore this for now and swim over the other side and climb up onto the strip of land. There's an Oxygen TANK on the floor and a Medicar in a crate up here; also, take note of the explosive point on the pillar. Jump into the water on the other side of the land and dive down through the underwater doorway avoiding the sharks. Swim round to your left to see a big stone hand pointing: keep swimming in that direction until you reach land.

Head straight on, taking out any guards, and enter the small hut at the far end 07). Inside you'll find a SPEAR GUN, plenty of Awwo for it and the ISTANBUL MAP. There's also a hidden Fourtain that can be found by going out the other door and rolling under the gap between the crates. Once you've collected all this, go back outside and jump into the water next to the hut. Dive down to the righthand wall, take out the two guards down there and grab both the EXPLOSIVES that they were guarding.

Go back to the surface and head back through the underwater tunnel to the area that you started in, and use one of the explosives on the

pillar you saw earlier. When it detonates, the fallen pillar will create a ramp up to the upper levels. Here you'll have to jump and swing from platform to platform to make it round until you land on a crate held up by a rope. Use your Turkish knife to cut the rope and you'll drop to the platform below where you can easily jump to reach the crane. Use the levers at the front of the crane in the same way as before to pick up the big head, only this time carry it over to the right where you can use it to smash through the wall (08).

Leave the controls and climb up the ladder behind onto the top of the crane. Climb down the other side and onto the platform at the bottom. Follow the path round and climb through the gap that you made with the head. Make your way around the ruined walls and go up the stairs at the side of the room. Move to the ledge at the side of this room and use the swing point to reach the other side. You'll find a doorway with a large gap in front of it - you can't actually make the jump from the level you're on, so you have to climb onto the side of the doorway and jump from there.

REACH THE CRANE AND DESCEND INTO THE PIT

>> From the start point, head forward and take a left into a large room with plenty of scaffolding. Take out any guards hanging around before you start climbing – the last thing you need is them taking pot shots at you. Start by climbing up the scaffold on your left as you come in the door and use the swing point to reach the opposite corner. You can't climb up any higher in this comer so you'll have to leap for the platform in the next corner - it's a long jump, but you can make it. Go through the gap in the wall then grab the ledge above it to pull yourself into the higher gap. Go through, back to the main room, and jump onto the ledge in the last comer of the room. Head through the gap in front of you and use the swing point to get to the other side of the

room and pull the lever inside. This takes you up to a large room with a crane in the middle. You have to make your way over to the crane and use the ladder on the side to get in. Use the controls at the front of the crane to control its pincers and pick up the huge stone head that's on the ground 06, then move it over the big hole in the ground – the head should be lifted as high as it can be over the hole for it to work. Once it's in position, a ladder will slide down behind you and some guards will follow; take these out and head up the ladder to the top of the crane. Climb up the crates and the ladder to reach the neck of the crane and walk along it. At the end is a whip point that you can use to get onto the stone head. As you land, a guard in the crane will drop the head - and you - into the hole.

BEIND THE VEAVEN'S CHAMBED

Start by jumping into the water and swimming straight down between the statue's legs. There are two underwater guards down here and you have to kill them if you want to take the Exposyres they're guarding (1). Once you have the explosives, use one of them on the statue's right foot. You need to place one on the left knee as well, but you can't reach it from down here.

Swim back to where you jumped in and dive downwards to see an underwater tunnel that leads to an area behind one of the grates. Turn the wheel in this area and kill the guards that attack, then make your way back to the ledge you started on. The water will now have stopped, so you can use the whip point on the right to reach the ledge that runs around the wall careful... some of the floors will crumble as you pass over them. When you reach the end, use the statue's trident as a whip point and get over to the other side.

Make your way round behind the statue and place your explosive on its right knee (12). When this explodes, one of the pillars will topple, leaving a platform that you can use to reach the higher levels. You're bound to be low on health by now, so fill up at the Fountain before heading through the door and pulling the lever you activated near the stage. This will raise the stage curtain, giving you access to the backstage area. Kill any guards then head up the ladder in the corner onto some scaffolding. - Stowaway aboard supply truck bound for rocket base

MISSION OVERVIEW

You mustn't let any enemy soldiers sound the alarms if they see you, so kill them quickly or destroy the alarm before they can reach it. MISSION OVERVIEW

As you continue through the base the amount of enemies you encounter increases, but you'll come across a couple of mounted machine guns to mow them down with – just be sure not to get caught in their line of fire yourself.

1/3 Before you cross the bridge at the start of the level, go down into the water on the left and swim down to find a vent, behind which are some Treasure Items.

The Super Soldier carries a Tesla, which will kill you very quickly wherever you are in the room. However, if he can't see you he can't hit you, so make sure the pillars are between you. Run down the stairs on the left and use the pillars for cover while you use your heavy weapons (preferably the Panzerfaust) to take him down. Scientists will also appear on the walkway and take pot shots at you, so either avoid them or shoot them quickly. There are some gas tanks around the room so if the Super Soldier gets close to any shoot them to cause him some damage. There's some Health and I in the corners of the room so grab it if you need to (you will). As the Super Soldier becomes more injured he moves slower making it easier to hit him. Once he's down don't forget to grab his Tesla and take out any remaining scientists.

Heinrich has a range of attacks, all of which will cause you some serious damage. If you see him swing his sword then you're about to be pulled through the air towards him. He will then either swipe at you with his sword or make rocks fall down on you.

It's relatively easy to avoid this attack; simply pull in the opposite direction when you are pulled into the air, then when you land run away from him. Heinrich can also raise zombies from the ground but it's best to simply ignore them as you'll just waste ammo and leave yourself open to attack.

Joining Heinrich are three Dark Knights and the recently zombified Marianna Blavatsky. They all have spirit attacks, which you'll have to run from. The Dark Knights are easier to destroy than Heinrich but are destroyed anyway when Heinrich is defeated, so you'll need to decide whether to take them out individually or just avoid them and concentrate on Heinrich.

For Heinrich himself your best weapons are the Venom and the Tesla, with a few Panzerfaust rockets thrown in. Strafe around him keeping a reasonable distance away (otherwise he'll clout you with his sword) and fire continuously. You'll need to raise the slime level in this room to gain access to the ladder and door on the far side. To do this you'll have to reach the switches that are dotted around the room. The only problem is the slime-covered floor won't make it very easy. Use the floating junk to get over to the first switch, then jump back on after hitting it – if you don't, the slime will rise over the platform you're standing on and you'll die. WHAT'S WRONG? CHICKEN?

In this level you'll take control of a Chicken Walker, which means you have some severe firepower at your disposal. Although you have rockets as well as your regular laser, you'll very rarely need them, so save them for whenever a large group of Death Bots are near each other and take them all out with one shot. You don't have to control the direction of the Walker, so just sit back and keep blasting. There are six Nibblers to find and they'll be scattered around the floor throughout the level. They aren't hard to spot so just keep your eyes open and you'll have no problems collecting them all.

Keep your eyes peeled for Nibblers.

SHIFTING SANDS

At certain points in the level you'll come across patches of quicksand. The only way over them is to use the various objects that are floating in the sand as stepping-stones to the other side. Most items will just float when you land on them, but some will sink and the plants will try to swallow you if you hang around on top of them. Occasionally there will be gaps that are too big to jump—when this is the case, there is usually a boulder above the quicksand that you can push down and use as an extra platform. across patches of quicksand. There are three Nibblers to grab as you run through and they are all very easy to spot – just don't hang around too long when you're trying to pick them up.

Bender's special move will make him spin continuously and will take out any enemy that you run into. Although it is a very useful move, be aware that while the special is happening you'll not be able to stop moving, so try and save it for open areas. Bender will also need a few seconds after he stops spinning to get his bearings, so he'll be momentarily vulnerable.

This chasm is seemingly impossible to cross, but a few well-placed blows at the bottom of the stone tower will send it toppling over to create a convenient bridge. Keep an eye out throughout the game for the opportunity to use similar tricks.

When you reach the old abandoned spaceship you'll have to do a bit more fancy jumping. The purple goo will kill you instantly if you fall in and it is pretty difficult to judge the jumps. When you first enter this room it seems safe enough. There are a few Weasels hanging around, but apart from that it looks like it's going to be a clear run to the other end. As you have probably guessed, this won't be the case. When you start moving down the room, huge chunks of floor will fall away and if you're not standing on a safe bit you'll fall to your death. The easiest way to ensure your safety is to stand near one of the Weasels. The floor underneath them is always safe – but you'll have to kill the Weasel without falling off the edge, which can sometimes be difficult.

Don't be fooled – it's not as safe as it looks.

SGRAPE

The area that you start off in has a large security door at the far end. Unfortunately it is locked tight and will stay that way until you kill all the robots in the area. As if that wasn't bad enough, you'll have to balance over the seesaws in the centre of the area to get over to the door. If you fall from the seesaws you'll die instantly, so time your jumps carefully and keep your eyes open for the Nibbler sitting on one of the platforms.

 The door won't open until all the enemies are dead.

Watch your step on the seesaws.

Another security door is blocking your path in this area and again you'll have to kill all the robots before it will open. Just search around the area for any bots that are hiding away and be careful not to fall in to the pit near the door.

TANKS ALOT One of Mom's sons will be at the controls of a large tank in the centre of the area and, to make matters worse, he has a shield covering the entire thing so you can't damage him. There are two mounted guns in the area: one to the tank's left and one to its right. It's the one on the left that you want to get to first, so head over to it and take a shot at the shield. Once hit, the shield will malfunction and leave the tank vulnerable to attack, so quickly run over to the other gun and get as many shots in as you can before the shield is repaired. Depending how fast you are, you may need to repeat this a fair few times, but the tank will eventually explode, leaving you free to cross over the swamp and turn off the Suck Ray. You do this by hitting the switch that rises out of the lava, but this won't happen until you have cleared the first two waves of Bone-Bots. When the platforms appear from the lava, jump on to the nearest one and use your roll to get under the bars that block you way. After you tread on the switch, the platforms will start to sink back into the lava, so be prepared to run for safety. There are two Nibblers in the area for vou to find. More tricky jumping here, but by now you should be getting pretty good at it. Whilst you're working your way round the edge of the lava moat you'll come across moving sections of wall that will push you off the edge and fire blowing statues. All of these can be beaten easily with a bit of well-timed jumping.

 The moving walls will try and push you into the lava.

TROUBLE

This will be the first of a few tile puzzles that you'll find scattered around the temple, and they are all completed in the same way. Tread on the tile switch near the wall and take a note of the sequence that the light flashes around the tiles. Now all you have to do recreate that sequence by jumping on the large floor tiles. When all the tiles are lit, the door will open.

As you enter this room you'll notice a familiar statue in the centre, so you'll probably realise that you'll be dodging more fireballs. This time you'll have to jump on all the switches in the room before the door will open — and with the statue continually spewing fire at you it's no easy task. You can avoid the fireballs by keeping on the move. Stopping for a second will get you hit and you can only take two or three fireballs before you die, so you can't afford to hang around! afford to hang around!

The easiest way to do this is to stand in front of a window then move as soon as the statue launches a fireball – repeat this with every window and the exit door will open

You'll have to face several to Il nave to face several Lava Monsters in here before you'll be allowed to leave. These creatures have a hot temper and if you try attacking them while they are glowing you'll be killed instantly. Fortunately, they are very slow and you can easily outrun them, so just keep out of their way until they stop and cool down. Then run in for the kill.

Lava Monsters will be released from the sides of the room.

Don't try to fight them until they

The statue will start throwing fireballs at you, so watch out!

TEMPLE COURTYARD

MORE OF THE SAME ...

There will be nothing in this level that you haven't dealt with before. A few symbol/switch puzzles, which are solved in the same way as the last couple, plenty of Bone-Bots and a Sorcerer. There are four Nibblers hiding in the level, but fortunately none of them are hiding very well. After you have pulled all the switches and opened the door to the next level, head back down to the main area and check in all the small rooms round the edges that have now opened - you'll find all four of the Nibblers inside.

E COURTYARD

Solve the symbol puzzles the same way as before.

The Sorcerer will be better defended this time round.

Remember to watch out for the kamikaze Bone-Bots.

TEMPLE TRAPS

This is your typical ancient temple, which means booby traps and obstacles at every turn. No matter what you're up against in here, the same rule applies: time it right, then jump. You'll need to find three Nibblers in here to unlock the extras. Two of them will be right in front of your eyes but to get the other you'll have to beat the clock in the spinning blade room.

At the end of the temple you'll have to face the Evil Sun God that has

caused you all this trouble. The only attack he has is fireballs - and you've already had plenty of practice dodging them - so they shouldn't be a problem. Keep jumping around until the shield protecting the Idol in front of you disables, then jump over and grab it. Once you have the Idol, work your way over to the left and place it on the stand to lower the next platform. Keep repeating this until the Sun God falls in the lava, then make your escape by climbing up the platforms in the centre of the room.

Get to the end before the platform sinks.

BALANCING ACT

At last, you get to play as Zoidberg! This excitement won't last for long, however, as you'll soon realise that this is easily the most frustrating level in the game.

Your job is to get Zoidberg and his steed through the swamp and to the generator in the time allowed. As always, the time limit is very unforgiving and you can only afford to fall off about 20 times overall. This may sound a lot, but when you realise that touching anything at all will result in a fall, it seems quite harsh. Try to memorise the course as you go along and you will slowly get used to the layout. Keep at it

and you'll get through eventually. There are five Nibblers lying around the course for you to collect. All are in plain view but you'll only get one chance to grab them, as you can't turn around.

Learn the course as best you can

TUDDESER GRUNGHING

You'll be trapped in this room until you have solved the number puzzle above the door. You have to press the numbers that are missing from the sequence in the right order to unlock the door, but if you press a wrong number the floor will open and you'll lose a life. You'll also be on a time limit so input the numbers as quickly as possible. The numbers to press to solve this puzzle are 8, 5, 4, 2, and 1.

Whatever you do, don't press the wrong number.

ENDER'S BREAKOUT

בננד על בכוצו KOROTS PART 2

Having discovered that tall, thin robots won't work, Mom decides to send out the big, fat ones instead. These are much harder to escape from as they cover a lot more area but their weakness is the same. After pursuing you for a while they will stop and pull in their spikes. This is your chance to climb up on top of them and finish them off with a Butt-Slam.

Keep on the move to escape the blades

4

The doors in this area have harmful laser beams running over them so timing is essential. Just be patient and wait for a gap that is big enough for you to pass through then go for it. Your main problem will be the little bladed robots that come out of the walls while you're waiting. You can bust these to bits with one simple Butt-Slam though, so get rid of them straight away.

Butt-Slam the small robots that attack.

BENDER

1

my manning

Don't try to fight them until they have cooled down.

בענע שבעני ROBUTS

New, tougher robots will now be sent after you and you won't be able to proceed until you have destroyed all the Bots in the section. The first Robot to take you on will be a tall one with plenty of spikes to keep you at a distance. Run away from it until it stops and retracts its spikes, and use your Dash move to knock it onto its side. It will only stay down for a few seconds, so get on top of it and Butt-Slam it to bits.

Keep your distance to avoid the spikes.

FUTURAMA LEELA'S LAST LAUGH

EELA'S LAST LAUGH

ROLL

You'll need to show off your jumping ability yet again in this section, as Leela has to make yet again in this section, as Leela has to mike her way down three conveyer belts that have laser beams all over them. Again, jumping accuracy and patience is the key to getting through it alive. The lasers will knock off quite a bit of health each time you touch them, so a lack of nations can pray your costly. lack of patience can prove very costly.

Remember to pick up the No1 Key Card from at the start of the third conveyer belt.

Jump and roll to get past the lasers.

BEND DYEK BACKWARDS

7:21:51

This room is filled with laser beams and they literally are going everywhere. It is quite difficult to judge the distances between the beams, so you'll have to between the beams, so you'll have to rely on your gut instinct when it comes to how far you should be jumping. Use your roll to get under any high beams and jump over any low ones. Once you, hit the switch on the other side of the room, the level will end.

Hit the switch and it's level over

MUMBER CRUNCHING 2

Your second number puzzle is much more difficult than the first. The numbers you need to input this time are 4, 2, 2, 2 and 8.

DU YA FEEL LUCKY?

As you step out of the puzzle room, a gun at the far end of the comdor will slide out from the wall and fire a continuous shower of red beams at you. Just one touch from any of these beams is enough to kill you, so don't stay in the line of fire for too long. You have to get inside the locked door opposite to find the swinch that will turn off the gun. Luckily this won't be a problem if you picked up the No1 Key Card from the case at the start of the third conveyer belt. If you didn't pick it up you'll have to go back and get it there's no way you're getting down that comidor with the gun still active.

Keep back to avoid the laser beams

CARUS ON THE TABLE

The rest of this level will have you collecting many numbered Key Cards and unlocking the doors of the same number. All you have to do is work your way around, collecting Cards and turning guns on and off. Why turn the guns on? They are perfect for removing the floating mines that are hovering in some of the corridors. Just make sure you remember to turn the guns off again before trying to walk up the corridor.

All the Key cards are numbered so you know where to use them.

Number 3 Card opens number 3 door. It's hardly rocket science.

"IT'S QUITE A LAUGH, IF MINDLESS AND REPETITIVE!"

PLAY#106 is out now, and available from most good newsagents

This monster can't be harmed by your powerful punches and will drain your energy should he touch you. Start the battle by smashing the machines around the arena, then throw items at Half-life to weaken him a little. Now collect a pipe and use it as a huge club to knock this evil creature into the broken machinery. Do this a few times and you will soon win the fight.

RADWAR

This battle can be a little tricky as Madman has very fast feet and can move extremely quickly. Start by destroying the consoles around Betty's prison, then set about fighting Madman. Use your punches to knock him about a bit, and then use flying punches to skip around the room avoiding Madman's attacks. When he misses with a charge attack, dash in and use your fists to teach him a lesson.

-11)

Flux has several awesome attacks, including a long-range bomb that explodes on contact. Start the battle by destroying the three generators around the edge of the room, then when the shield is down get stuck into Flux. Pick up this monster and hurl him at the machine in the centre, then run away to avoid the projectiles being thrown at you. Once the generators reappear, destroy them again and throw Flux into the machine a few more times to finish him.

RAVAGE & THE LEADER

This battle can be extremely tough, as Ravage can perform the same manoeuvres as you. Start the battle by trying to punch him a few times, then switch to grab and throw moves to cause a little more damage. Once you have depleted his health bar the first time Ravage will attack again accompanied by two grunts. Dash around the arena to avoid the bullets and then use the logs that fall from the ceiling to club the boss. If you get a chance, get in close and use your throws but it is best to wait until Ravage is slightly dazed after an attack before attempting this.

This is the toughest fight so far, as you begin the battle as Bruce Banner and must regain your powers before you can tackle the leader. Hit the four switches on the pillars to lower the shield, and then start punching the fast moving alien. Use your jump punch to knock him to the floor, and then run away a short distance to help you to dodge the laser blasts. When multiple Leaders appear, take them out one by one with flying punches until you find your target, and then go for the kill.

Season 1

Your primary goal is to chase the

crashes. Whilst driving, crash into

blue coupe and blast it until it

as many cardboard boxes as possible for the secondary goal.

After grabbing the first Huggy Token, turn around and chase back up the street, then drive across the pedestrian footbridge on the right

to grab the Key Fob.

286

After leaping through the building, follow the coupe for a couple of blocks, and then ride along the ledge on the left-hand side next to the Sheldon Building. Keep your speed up and you can jump over to collect the first Huggy Token.

After driving down the alley with cardboard boxes a second time, continue to follow the coupe and it will drive down another small alley and then through a shop window. Search the grass verge just to the right to collect the second Huggy Token.

Special Withdrawal

Get to the bank quickly, then chase the black van to stop it reaching the city limits. Your secondary task is to shoot at least 20 gas canisters as you drive.

KEY FOB: While chasing the van, blast the double damage power-ups by the traffic lights, then drive into the small car park under the building to get the next Key Fob.

KEN 1: Leap over the jump at the very start of the level and you should land almost on top of the first Huggy Token. Make sure you collect it before driving over to the bank.

TOKEN 2: The second Huggy Token is found inside a small coffee shop on the corner. This is located very near to a special event power-up and just past the new weapon pick-up.

Your primary goal for this episode is to chase the white coupe responsible for the armed robbery at the Gas 'N' Go. Near the end you'll enter a junkyard - shoot the gangsters to achieve the secondary goal.

KEY FOB: Blast the barrels in the fenced area opposite the junkvard and you can find the key hidden behind.

HUGGY TOKEN 1: Ride the small ledge beside St Mary's department store to get the next token. Note: If the suspect doesn't go past this shop, the Token is by the railway station

HUGGY TOKEN 2: Near the junkyard is a roller disco, and the second token can be found inside. Look for a weapon pickup just outside the door if you have trouble finding it.

STARSKY & HUTCH

EPISODE 4

Your primary goal for this episode is to chase down the brown coupe and blast it until it crashes to a halt. Whilst driving you need to take out the blue coupe to complete the secondary goal.

Jump over the bridge, then turn hard left and smash through Deb's Café window. The Key can be found on the wasteground, which is on the other side of the shop.

As you drive down the steps towards Central Park you'll see the first Huggy Token near the fountain. Take a slight detour across the grass to collect it.

As you near the city limits you can find the second Huggy Token under a small walkway outside office building. Look out for a viewer boost and stay close to the building.

Squealing Figgy

This episode you must protect the unmarked car and follow it to the safe house. Blast at least ten Special Event icons as you drive around the docks to drop the containers and achieve the secondary goal.

MEY FOB: As you near the exit to the docks, look out for a small passage between the containers on the right. Drive through the pipe and take the jump at full speed to collect the Key.

HUGGY TOKEN 1: Leap over the top of the freeway and you can find the first Huggy Token above the bridge.

HUGGY TOKEN 2: Once the blue car appears to chase Louie, follow it to the next dockside area, then turn left onto the train tracks and you will collect the second Huggy Token in mid-air.

Spisode 6 D A Little Mambam

This is the first Boss chase and Carlton Breezy drives a pretty fast limo. Take him down whilst leaping as many car transporters as possible to achieve both objectives.

KEY FOB: The Keys are hidden inside the underground car park. Turn left as you enter, then look behind the wall to find them.

HUGGY TOKEN 1: After exiting the car park, follow the limo straight up the street ahead, then turn the corner and look on the grass verge on your right for the first Huggy Token.

HUGGY TOKEN 2: Take the steep bending ramp next to the large building and keep yourself straight through the jump. The second Huggy Token can be found beside the landing zone.

episode is to chase down the yellow trike and blast it until it crashes. Whilst driving you need to ensure that your shooting accuracy remains above 75% to achieve the secondary goal.

KEY FOB: The Keys can be found on the ledge beside St Mary's department store, where you found a Huggy Token in an earlier episode.

HUGGY TOKEN 1: At the very start, quickly turn around and you can see the first Huggy Token. Use the ramp to jump up on top of the parked lorry and collect it.

HUGGY TOKEN 2: As you chase the trike you'll notice the second Huggy Token high above a bridge. Keep chasing the trike along the wasteground and you can find a jump that will enable you to reach it.

Swann. Whilst driving you need to crash into 50 cardboard boxes to achieve the secondary goal.

KEY FOB: The Key can be found hidden inside Wildbury's burger bar on the corner – just before you get to the raised car park jump.

HUGGY TOKEN 1: In the junkyard area, drive quickly through the small section opposite the entrance and use the jump to reach the Huggy Token above the fence.

HUGGY TOKEN 2: The second Huggy Token can be found hidden behind a wall on the road that runs around the park. Keep your eyes open whenever you ride past the park and you'll soon find it.

>> ALL THE LATEST PERIPHERALS REVIEWED BY OUR TEAM OF EXPERTS!

More hot peripherals have been released this month, and as usual we test them to their limits to tell you which products are worth splashing out on!

£39.99

It's been almost a year since we first saw the Eye Toy at ECTS, and now the finished hardware has arrived. It's rather like a web cam that attaches to your PS2 via the USB Port and enables you to view yourself on the TV screen. It comes with a game disc featuring 12 minigames, ranging from simple fighting

games where you must punch or head butt items flying across the screen at your virtual image, to games including plate spinning, keepy uppy, window cleaning and disco dancing. All the games are simple to understand and play, making this device perfect for parties, and gamers can enjoy it

VGA BOX

PLIED BY - LOGIC 3

This unusual device has been designed for people that have limited space and want to utilise their PC monitor to act as a screen to play their consoles. The unit plugs in to the computer monitor and basically enables you to switch between your computer information and up to four other devices plugged in via composite cables. This means that gamers with several consoles can plug them all in to the device and switch between them at a touch of a button. The display is obviously slightly enhanced by using the power of the monitor, but this is minimal and not very noticeable at times. In essence this is a good idea - perfect for gamers who own computers and don't have space for a TV in their bedrooms.

whatever their age. It's a must-have peripheral for your PS2 and we're pretty confident you'll eventually be able to use it for video messaging and online gaming.

SUPPLIED BY – PYRAMAI

£149.90

>> The Pyramat is a special mat fitted with a bass tube, and designed for home gaming as a chair and speaker system all in one. It's quite comfy to sit or lie on, similar to the mats used in school gyms. The speaker system is hidden in a triangle-shaped section at the head of the mat and provides fairly good sound on most games. It can also be used to plug in an electric guitar or

stereo system. However, the main problems we found with the device is the short cables which limit its positioning, and the fact it's a little too pricey for the average gamer. The simple fact is, the Pyramat isn't good enough to make you want to spend £150.00.

PROFESSIONAL MODE
Select Arcade mode then highlight Hard on the difficulty selection screen. Hold **©** + **©** and it will change to Professional. EASY MONEY

You need two memory cards for this trick. After you've earned about 200,000 Credits, buy a good car and upgrade it to the max. This will leave you almost broke, so save this car to the memory card in slot 2. Now return to the title screen and load your last game from slot 1. This will give you your money back and you can now go and trade the car from slot 2. The car that you just upgraded to the max will now only cost retail price
